

# Studiocode Feature List

 indicates a new or improved feature in Version 4.0

## Capture

-  • Capture high definition video
- Capture from multiple media sources
-  • Code & Review the video while capturing video content
-  • Instant replay during capture
- Supports DV, DV widescreen, Analogue, MPEG4, SDI, HD
-  • iCal capture scheduling
-  • Compress video files as you capture into your custom settings
- Supports 4x3, 16x9, & native movie dimensions
-  • Live Code Matrix viewing during capture
-  • Capture in full screen
-  • Remote capture control

## Coding Structures

- User defined coding templates
- Unlimited code & text buttons for templates
- Define keyboard hot keys
- Set lead and lag times for codes or leave them open
- Define exclusive code behaviors with activation or deactivation links
- Unlimited Code Input Windows
- Code in full screen
-  • Transcribe & add notes into instances during capture
-  • Supports multiple input devices for multiple coders
- Edit and re-edit your templates as often as required
- Code and access events live

## Search

-  • Search for information based on codes, labels, text or transcription data
-  • Up to 20 search combinations
-  • Perform multi-level Boolean search routines

## Search (cont)

-  • Search for data from 1 event or across an entire database
-  • Find and review events from the Code Matrix window
-  • Set up Boolean search criteria within the Matrix
-  • Find and analyse transcription text and information

## Analysis

-  • Up to 20 search combinations using Boolean logic routines
- Pull together searched statistical information with the corresponding video
-  • Compare & apply the matrix across different video files
- Create a still image from any video frame
-  • 46 statistical script commands
-  • Conduct multi leveled statistical inquiries
-  • Export statistical information for further investigation in other programs
-  • Set up KPI alerts in the Code window for instant notification
- Stack multiple video files to play side by side
- Overlay any two video files
- Create video databases
- Review frequency lists for events
- Review sequential frames within any video instance through the Instance Monitor
-  • Transcribe text into instances
- Draw angles and lines on any movie frame
- Create freeze frame movies with drawings to highlight key events
- Stack Timeline and Instance movies
- Switch between different views using hot keys
- Attach tutoring notes to any clip
- Integrate transcripts with codes

## Making Movies

- View Instances in multiple window sizes
- Replay video at different speeds, frame by frame, fast forward/backward
- View single instances or compile multiple instances and make a movie
- Choose order of instances for your movie
- Present a movie on your computer or an external device
- Integrate your movie into other applications such as PowerPoint or Keynote
- Compile movie presentations with titles in the Movie Organizer
- Edit instance lengths
- Edit the codes and labels of an instance
- Create presentations with overlaid transcription or tutoring notes
- Show text track captions in the movie output window

## Transcription

-  • Create or import transcriptions
-  • Transcribe footage live
- Play transcripts as a caption track
- Find and analyse text strings
-  • Populate a timeline with transcription information

## Import

- Edit lists
- Tab delimited files
-  • Transcript Text
-  • Transcriber XML
- CSV files
- METI data
- Laerdal debrief data

## Export

- Excel edit lists
- XML edit lists
- Export your Matrix into Excel
-  • Matrix HTML export
-  • Matrix iPhone HTML export
-  • Export Transcript text into Excel
- Export the Timeline as an Edit list
-  • Transcriber XML
- Instance Frequency reports
-  • Final Cut XML
- Convert your movies for export to other movie formats
